

Tip Of The Week

December 22, 2008

Get Through the Holidays Safely

When was the last time you reviewed your safety and work practices? Remember any type of electrical testing involves risk. Whether you are performing power analysis, current signature analysis, measuring DC resistance of windings, or even a simple resistance-to-ground test, complacency can lead to injury! For this week's tip, take some time and think safety.

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 126 or lou@pdma.com.
